

Dear Luisa, Sylvia, Graciela, and Carmen,

I wish to thank you all for having invited me to participate as a supervisor in one of the IPSO scientific activities in the last IPA Congress in Mexico City. It has been an honor and a very rewarding experience for me.

I think that the whole thing has been prepared so accurately and with such a visible caring attitude that part of excellent result is due to this.

Not to speak of the interesting clinical material brought by Carmen Cuenca so courageously and in an authentic way. Carmen's presentation as well as Graciela's chair allowed for a frank, interesting clinical and technical discussion.

Let me also thank, through you, all those who so actively attended the event: please convey them all that I had the impression of a deep involvement by all the candidates in understanding, comprehending, grasping the dynamic of the case both globally and in its clinical subtleties. The seminar, I think, has been a truly learning experience for all of us. Thank you so much. I look forward to seeing you all as qualified analysts (some of you, I know, already are) in future IPA events. Future is yours as well as that of psychoanalysis. Also, I believe its development is in the hands of people like you.

Cordially yours,
Vincenzo
